

3.copy with wildcard

The screenshot displays the Microsoft Azure Data Factory portal. On the left, the 'Factory Resources' pane shows a hierarchy: Pipelines (1) containing 'pipeline1', and Datasets (2) containing 'ds_blob' and 'ls_blob'. The main canvas shows 'pipeline1' with a 'Copy data' activity. Above the activity, the 'Validate' button is highlighted with a red box. The activity's configuration pane is open, showing the 'Source' tab. Under 'File path type', the 'Wildcard file path' radio button is selected and highlighted with a red box. Below this, the 'Wildcard paths' section shows a 'source' field with the value 'Wildcard folder path' and a file pattern field with the value '*.csv', both highlighted with red boxes. The top navigation bar includes 'Data Factory', 'sreeeadf', a search bar, and user information 'sreyageorge03@gmail.com'.
